PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5+ years of experience architecting and shipping production web, mobile, and desktop applications with React, Next.js, Node.js, Express.js, and MongoDB. Promoted from Software Engineer to Senior Software Engineer after leading 15+ end-to-end builds for international clients, from database schema through deployed UI. Comfortable owning a feature from API design to the interface that consumes it, in Agile teams.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), React Native, Electron.js, Redux, Three.js, Tailwind CSS, Sass/SCSS, HTML5, CSS3

Backend: Node.js, Express.js, Nest.js, MongoDB, Supabase, PostgreSQL, Firebase, Node-RED, REST API Design, JWT, OAuth

Web3 and Blockchain: Solidity, Web3.js, Smart Contracts

Cloud and DevOps: AWS EC2, AWS Amplify, Route 53, Vercel, Docker, CI/CD, GitHub Actions

Tools and Practices: Git, GitHub, Agile/Scrum, OpenAI API Integration, Stripe, Performance Optimization

AI and Python: Python, LLMs, LangChain, Retrieval-Augmented Generation (RAG)

PROFESSIONAL EXPERIENCE

Senior Software Engineer, [Open Drawing](#) | Costa Mesa, California (Remote) Sep 2025 - Present

- Own architecture end to end for 3 production products (Admin, Staff, and End-User portals), from API contracts through the React and Next.js interfaces that consume them.
- Re-architected rendering and state management to improve performance and reliability under peak load.
- Standardized a shared component library and API client layer across all 3 products, removing an estimated third of duplicated code and shortening feature delivery.

Senior Software Engineer, [Isoft Studios](#) | Lahore, Pakistan Mar 2025 - Sep 2025

- Owned 4+ MERN stack projects end to end, including database schema design in MongoDB, REST API architecture in Nest.js and Express, and the React frontends that shipped on top.
- Built an AI-powered survey application (OurOffice) using LangChain with dynamic prompt templates and Twilio SMS integration, handling 10,000+ users.
- Mentored developers on a 6-person team and introduced structured code reviews, improving feature turnaround by 25%.

Software Engineer, [Zweidevs](#) | Lahore, Pakistan Aug 2023 - Mar 2025

- Shipped 4+ cross-platform applications end to end with React, React Native, Electron.js, and a Node.js/MongoDB backend, reaching 1,000+ active users.
- Redesigned MongoDB schema and query patterns for the two highest-traffic services, cutting API response times under peak load by roughly a third.
- Scoped technical estimates and timelines for high-priority proposals, directly contributing to \$5,000+ in won client deals.

Software Engineer, [Nayyar Technologies](#) | Lahore, Pakistan Jun 2021 - Aug 2023

- Built both the backend and the drag-and-drop UI for an AI-powered website builder, cutting client onboarding time by 40%.
- Designed and integrated 20+ RESTful APIs with Node.js and Express, replacing a legacy Node-RED backend and improving system modularity.
- Lifted platform performance by 40% and client sales by 15% through backend refactoring and real-time React and Redux UI work.

PROJECTS

[OpenDrawing - AI-Powered BOM Platform](#) | Custom-Trained AI Models, OCR Sep 2025 - Present

- Automated electrical diagram conversion into structured bills of material (BOM) and asset data, using a custom-trained AI model for OCR and automated component counting, processing thousands of diagrams at 90%+ accuracy and saving electrical engineers hours to days of manual work per project.

[Curl Compass](#) | React Native, Node.js, MongoDB Mar 2024 - May 2024

- Developed a health-journaling app adopted by 100+ users in its first month, with secure authentication, goal tracking, and a real-time analytics dashboard.

[NeverLeftFor Venues](#) | React, React Native, Next.js Feb 2024 - May 2024

- Launched an event management platform with live ticketing and QR code check-ins, integrating Stripe to process 300+ transactions per month.

[Custom Websites Club](#) | React, Node.js, Node-RED, MongoDB Nov 2022 - Aug 2023

- Created an AI-based website builder with drag-and-drop widgets and live preview, connecting the OpenAI API to auto-generate content and cut design effort by 60%.

EDUCATION

Bachelor of Science in Information Technology, University of Education, Lahore

Merit scholarship recipient. Coursework: Data Structures, Advanced Web Development, Software Engineering.

ACHIEVEMENTS

- Ranked in the top 1% of 500,000+ developers on WakaTime in both 2024 and 2025, with 1,389+ hours of tracked active coding per year.
- Placed 2nd out of 43 competing universities at PUCON, a national programming competition hosted by Punjab University.
